DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, drawn to the *first circuit arrangement* according to the invention for controlling the *horizontal rows* of a display (e.g., see Fig. 3; Page 4, Line 13 - Page 7, Line 11 of the instant specification).

Species II, drawn to the *first circuit arrangement* according to the invention for controlling the *vertical columns* of a display (e.g., see Fig. 5; Page 7, Lines 12-20 of the instant specification).

Species III, drawn to the *second circuit arrangement* according to the invention for controlling the *horizontal rows* of a display (e.g., see Fig. 6; Page 7, Line 21 - Page 11, Line 8 of the instant specification).

Art Unit: 2629

Species IV, drawn to *the second circuit arrangement according to the invention for controlling the vertical columns of a display* (e.g., see Fig. 8; Page 11, Lines 9-25 of the instant specification).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claims 1-6 and 10-15 are deemed to correspond to **Species I**.

Claims 1-6 and 10-15 are deemed to correspond to **Species II**.

Claims 1-19 are deemed to correspond to **Species III**.

Claims 1-19 are deemed to correspond to **Species IV**.

The following claims appear to be generic to the above identified species: Claims 1-6 and 10-15.

Art Unit: 2629

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

Any international application must relate to one invention only or to a group of inventions so linked as to form a single general inventive concept (see MPEP 1850).

As demonstrated by the “X” references on the International Search Report, at least one independent claim of the application does not avoid the prior art, therefore, the special technical feature of the application is anticipated by the prior art.

Consequently, the inventions listed as species above do not relate to a single general inventive concept under PCT Rule 13.1

Moreover, the species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Art Unit: 2629

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
